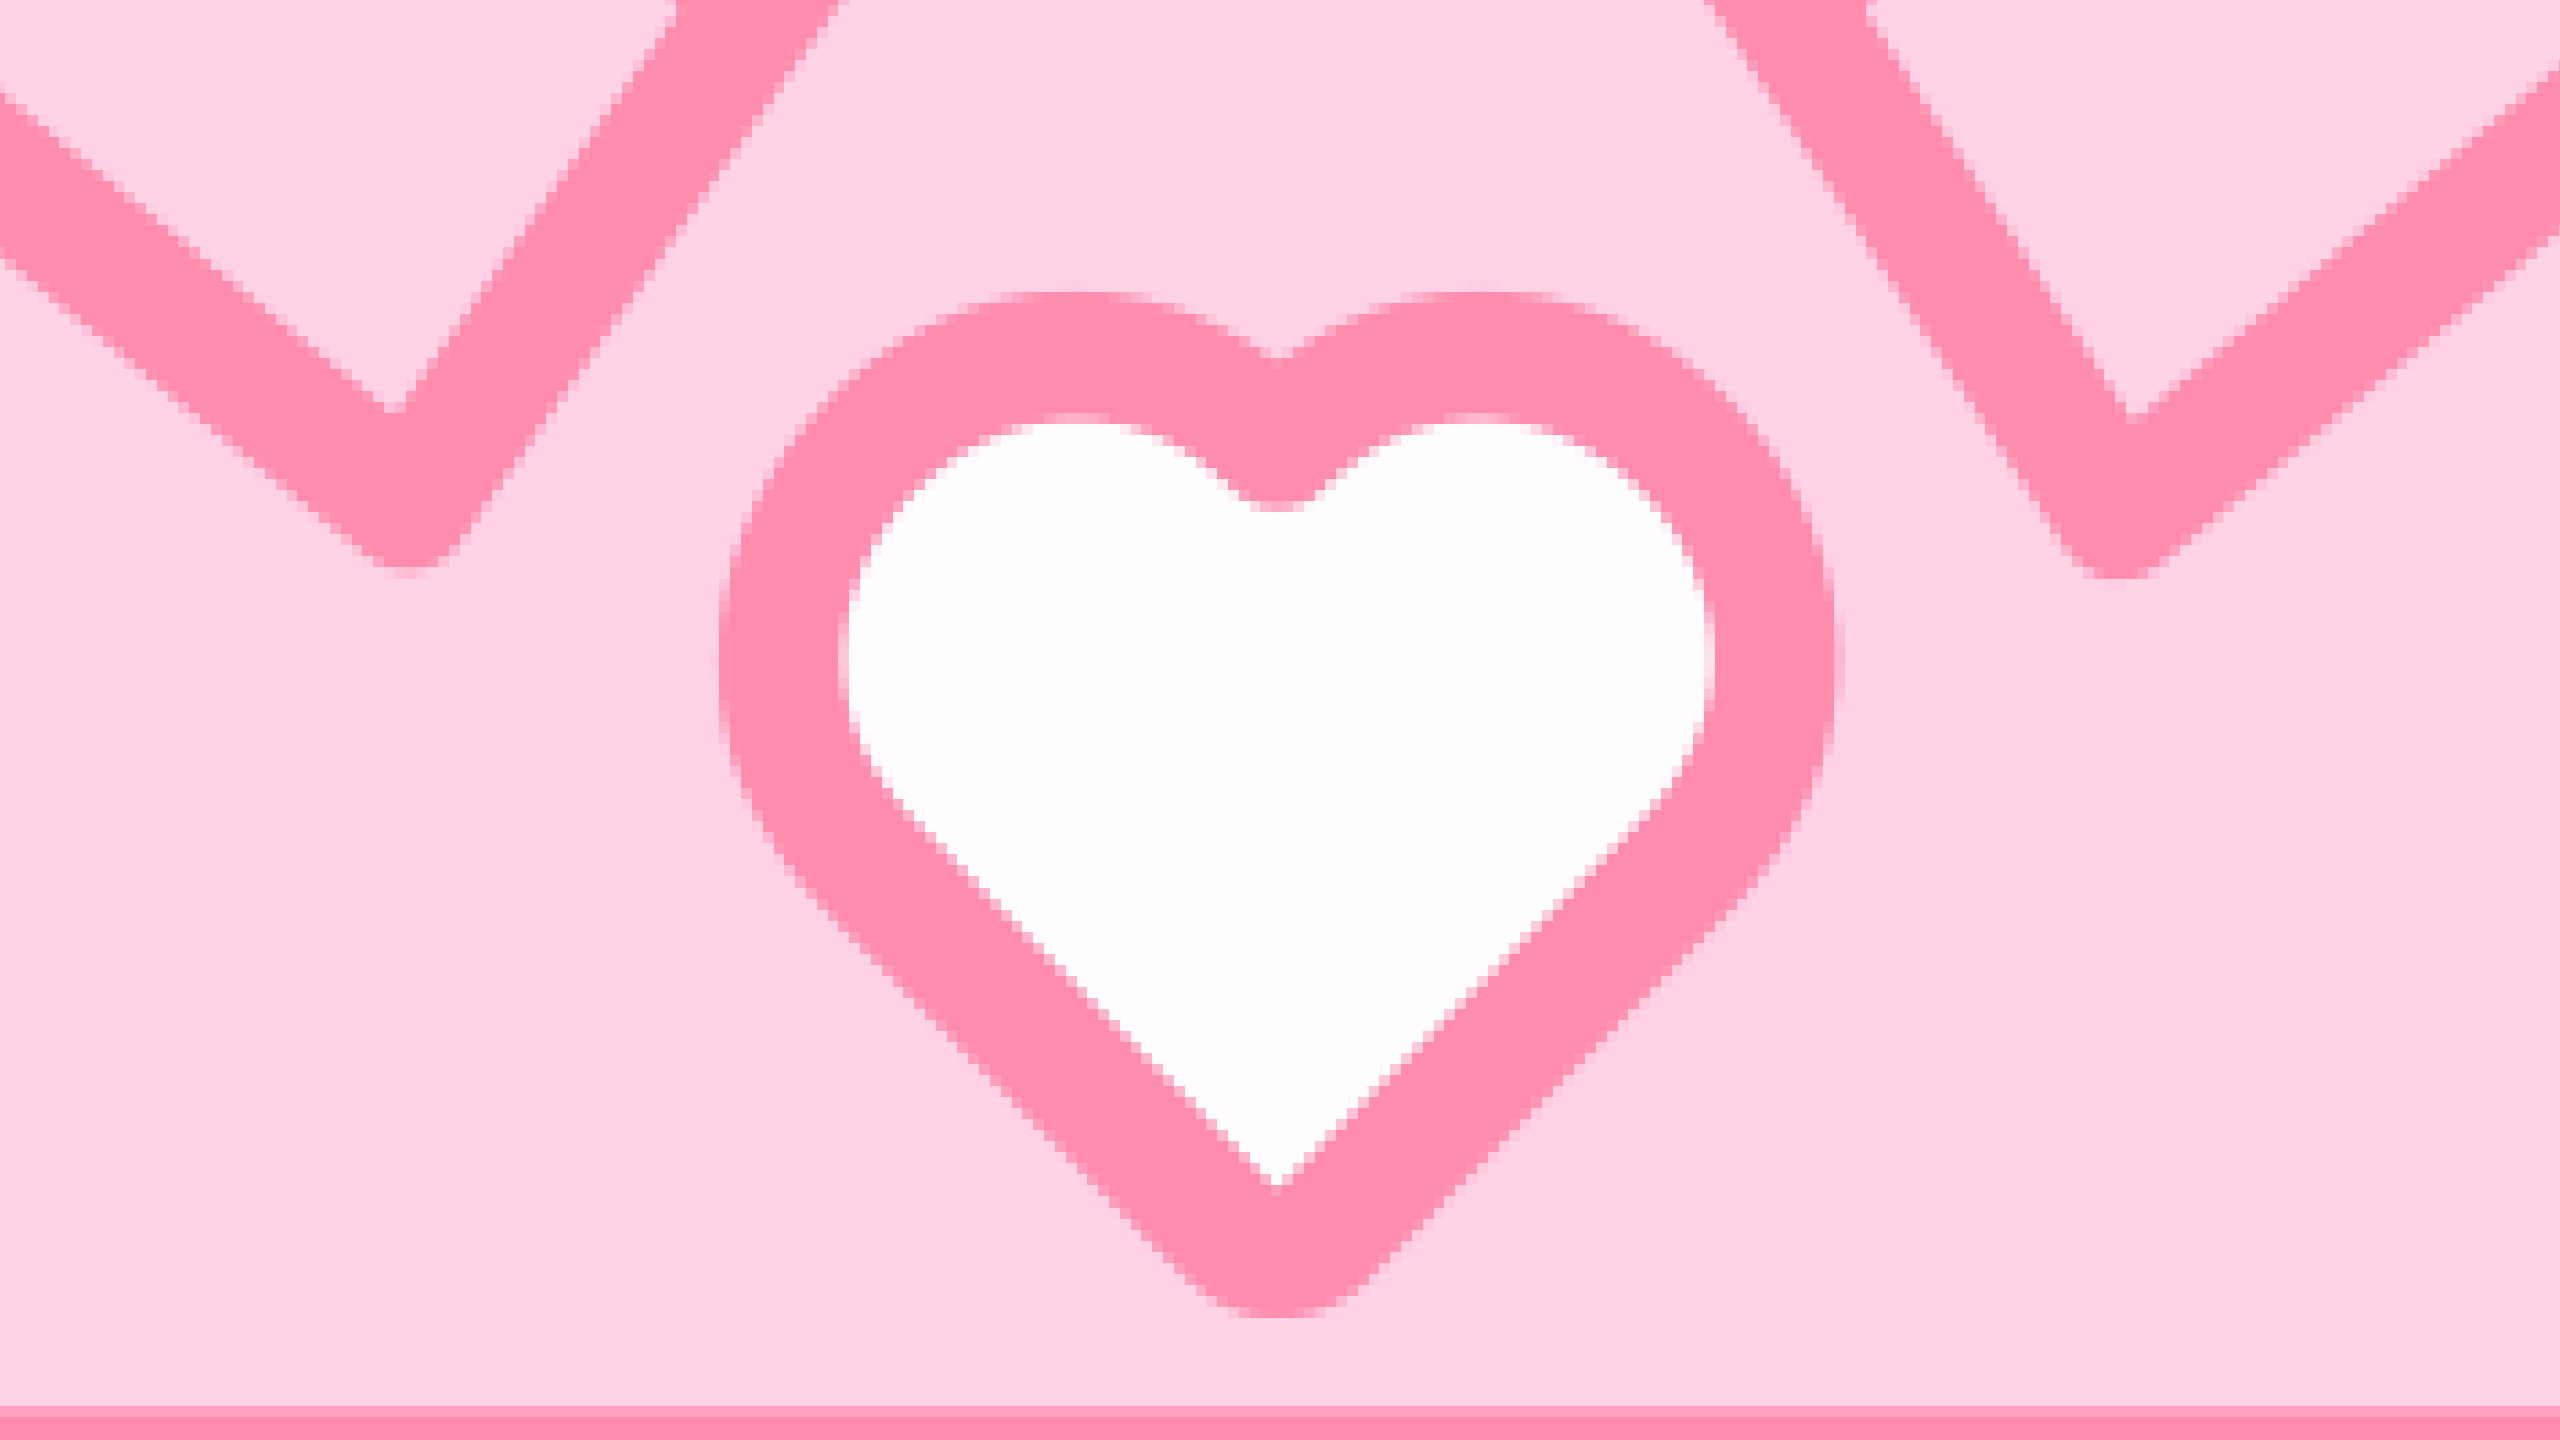
LightGBM Regression

XG Boost

Improvements:

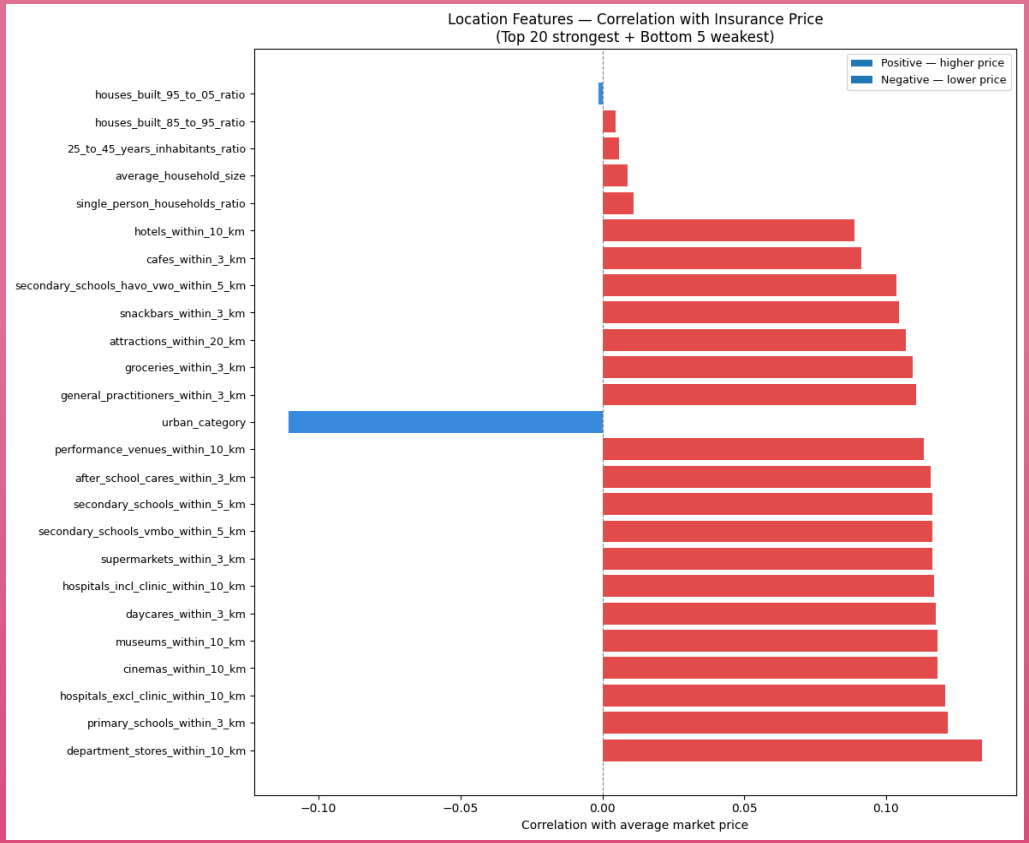
- Deductible + price
- Weighted LightGBM (based on feature importance)
- Second layer



Deeper analysis

- The obvious features - age, vehicle value, engine power

- Location - urban density

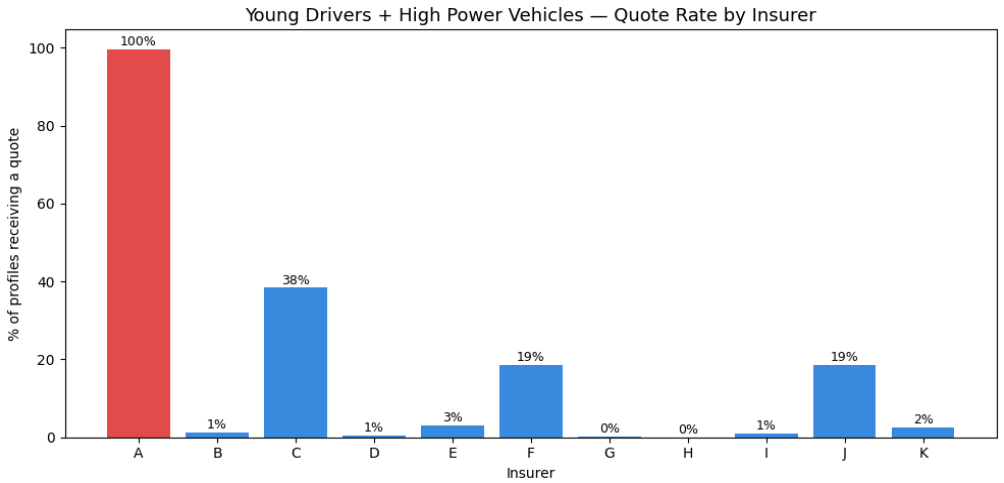


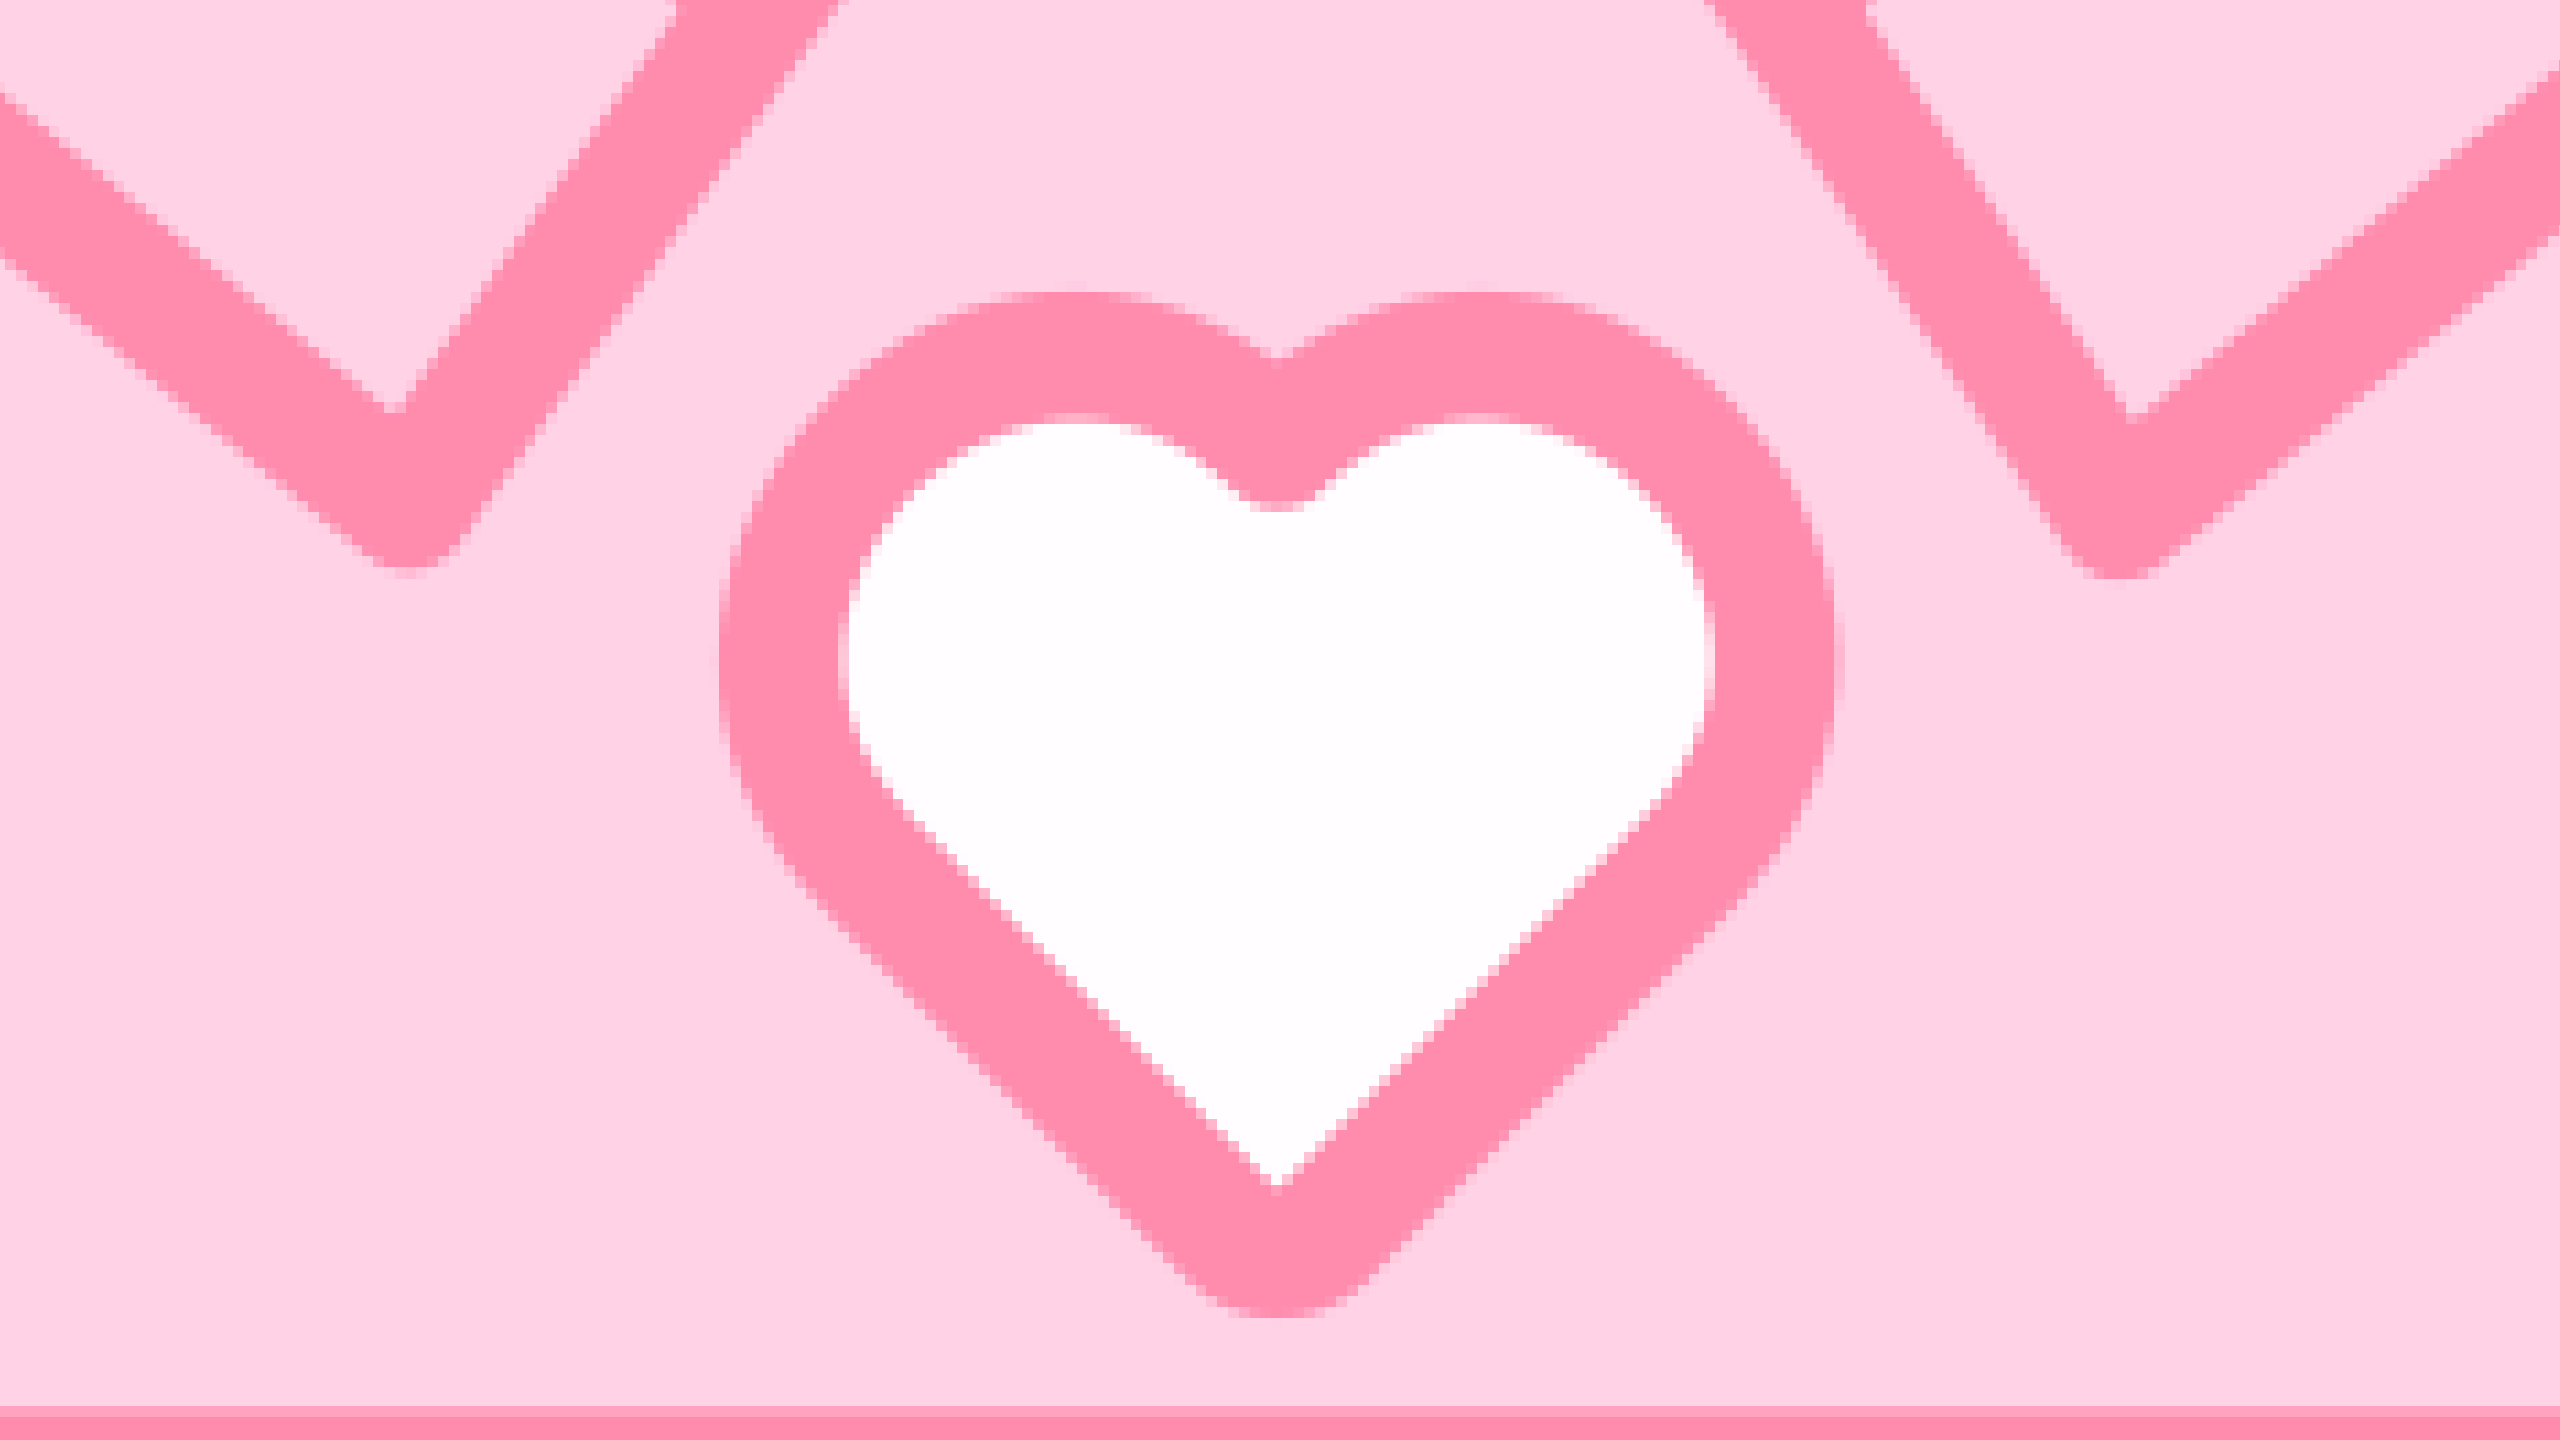
Deeper Analysis

Feature combinations:

- young driver + high power vehicle
- experienced driver + low value vehicle
- age + claim-free years

- Insurer A – mass market player
- Insurer K – cherry-picker
- Insurers H & E – expensive brands





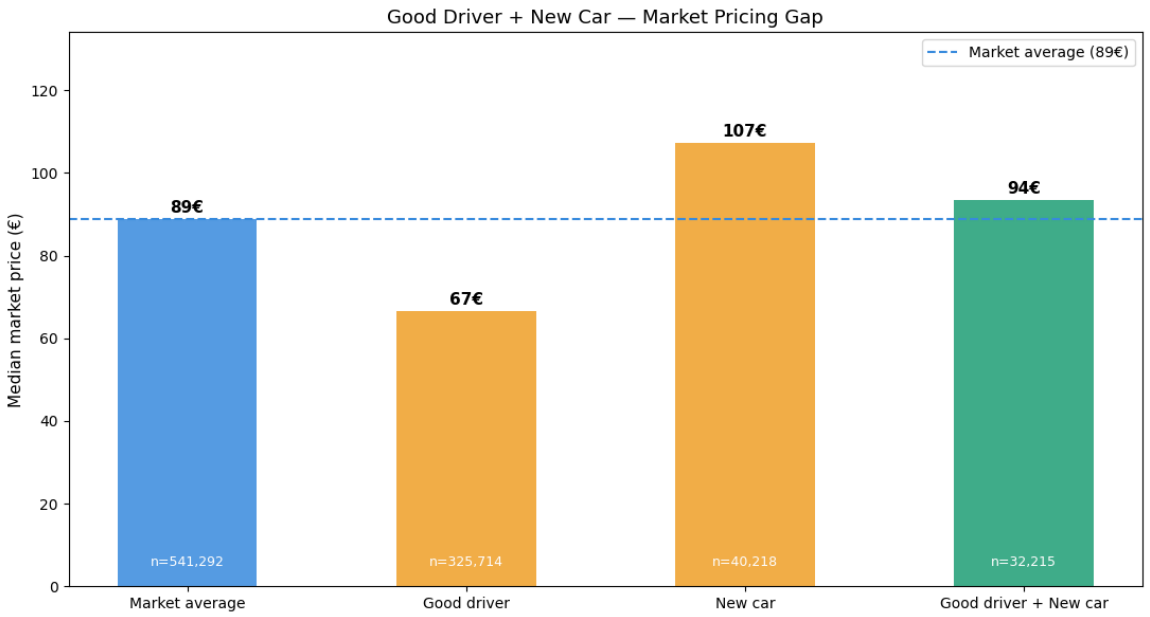
Princess Insurence

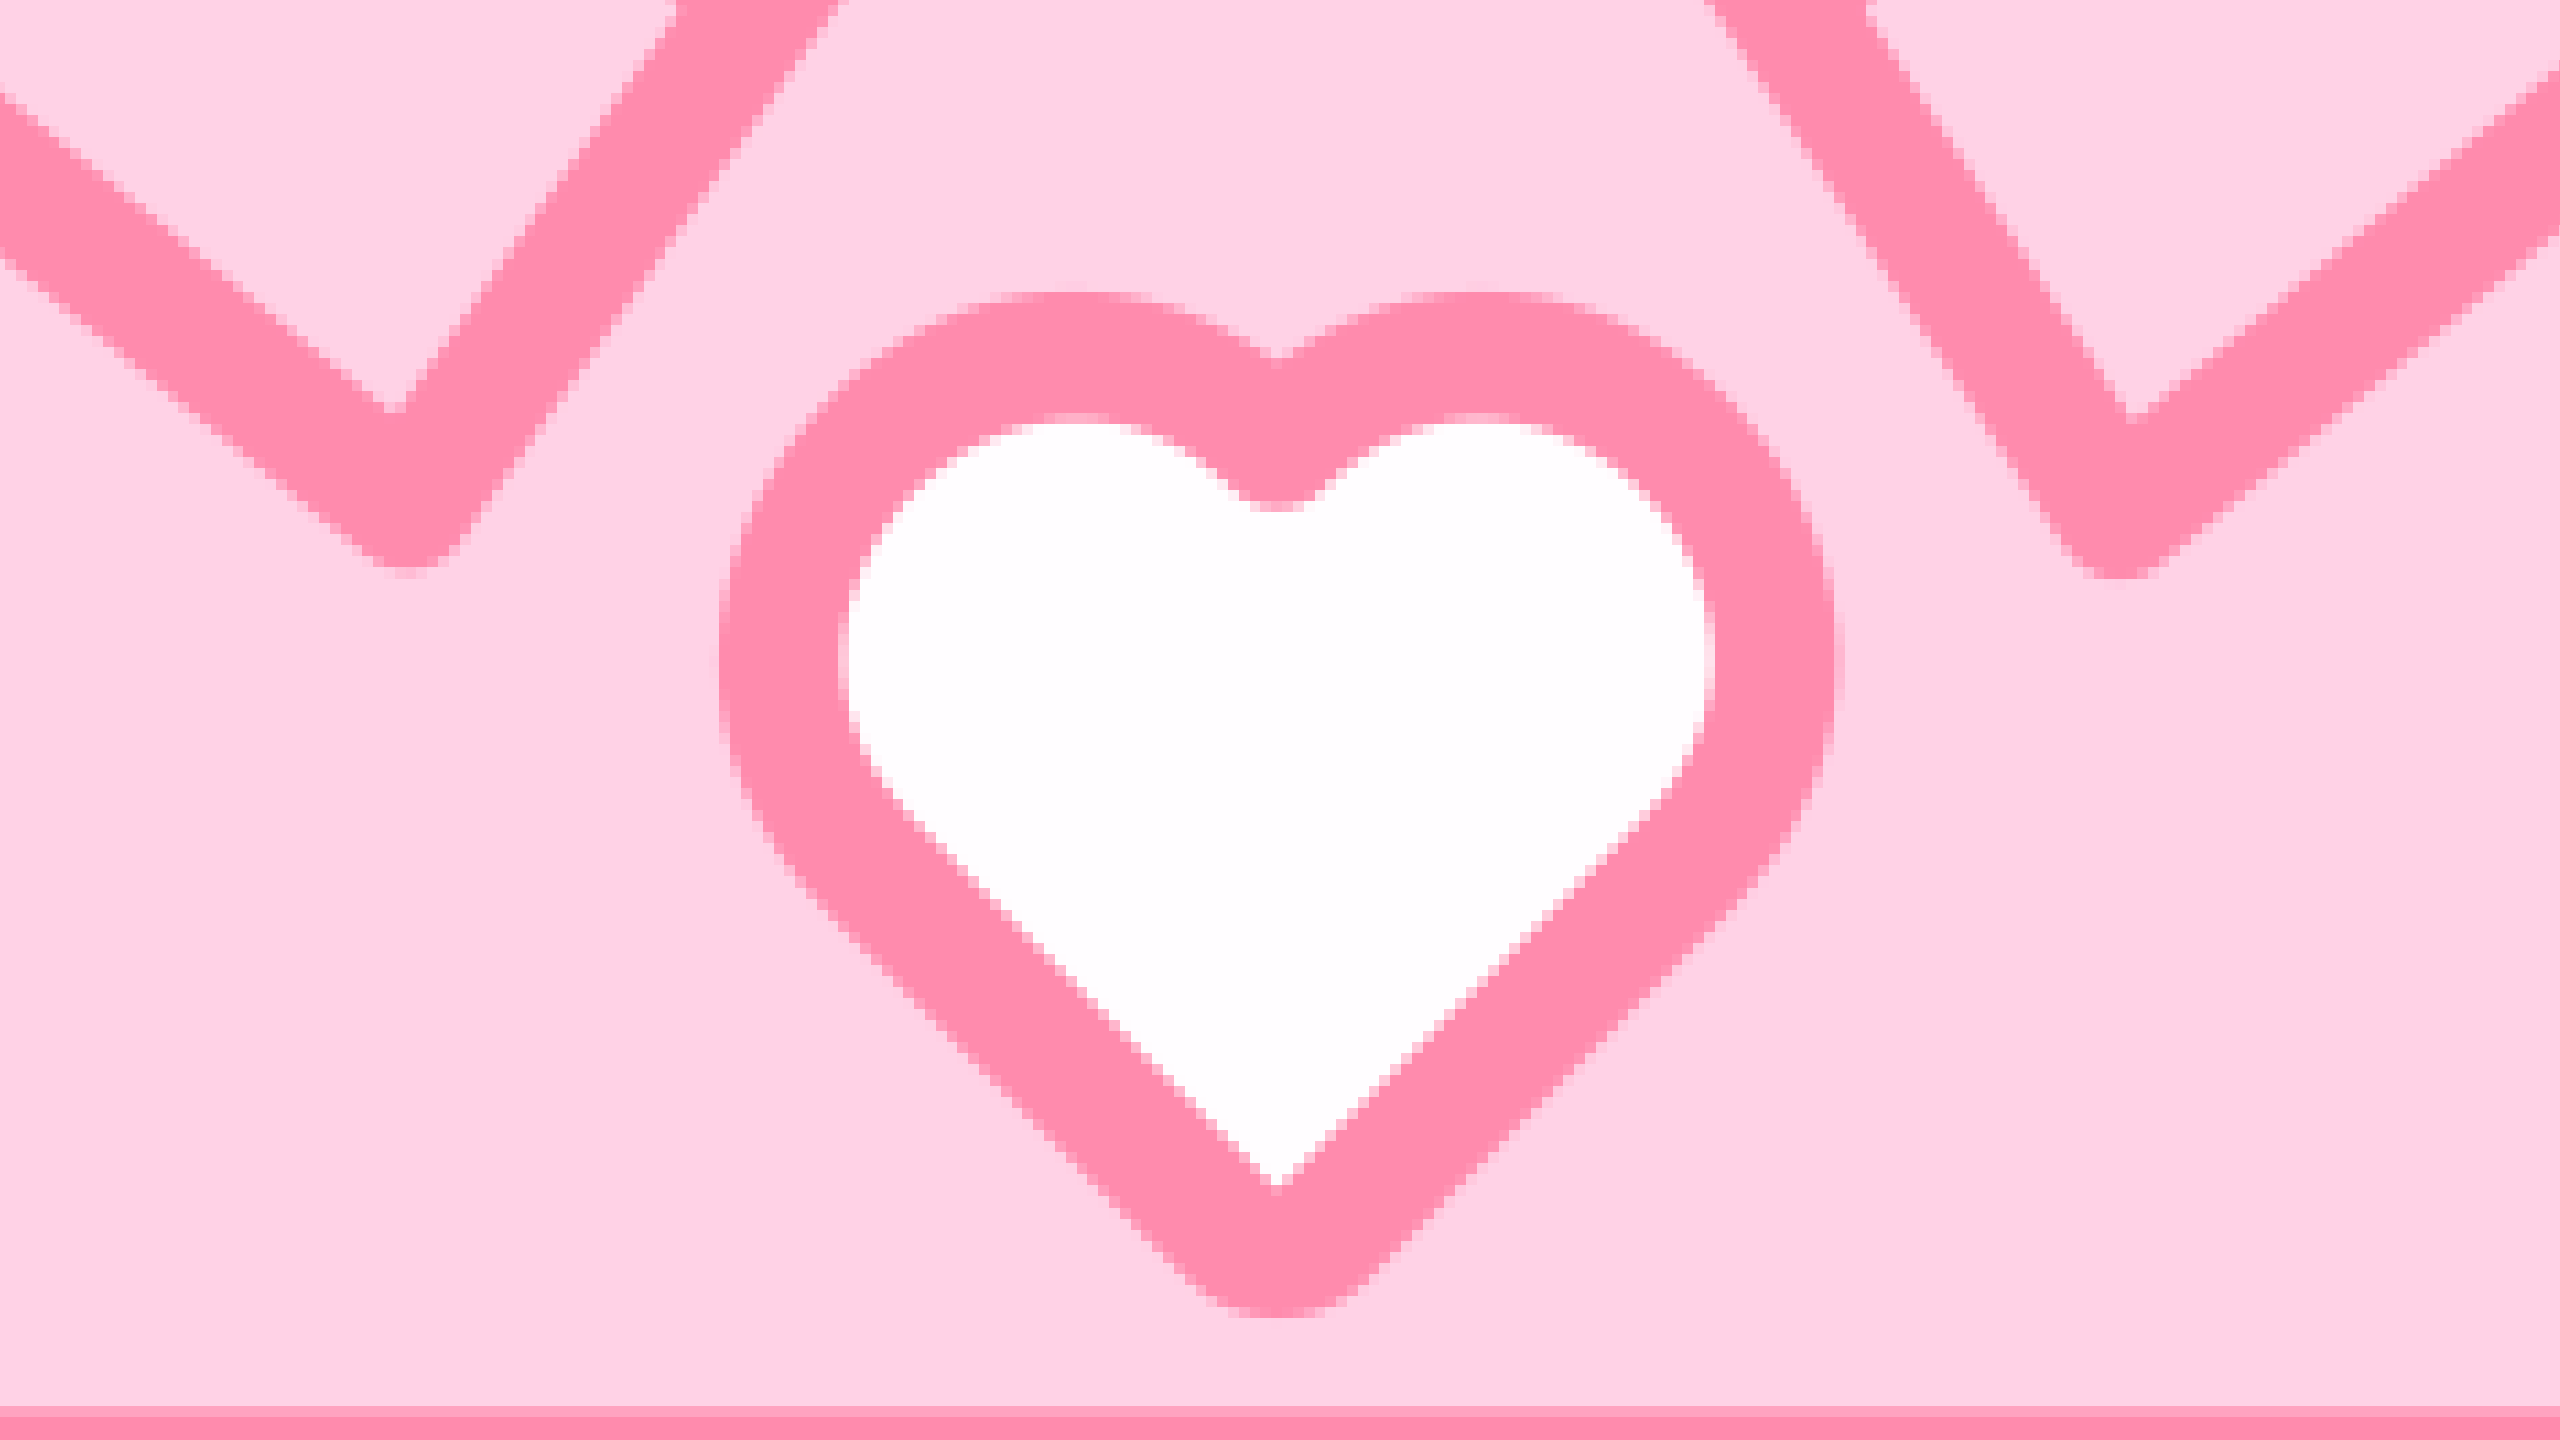
Drive safely like a princess

Princess Insurence

Gaps:

- young driver + high power vehicle
- Good driver + new car
- Deductible
- Annual payment





Princess Insurence

Future improvements:

- Traffic penalty points
- Data from other insurers
- Vehicle reliability surveys

Thank you for your attention!
